
foXServe firmware FREE with SDK patch

Are you a fox LX 832 owner?

You are in the right place! We are proud to announce the availability of foXServe firmware!

You can download foXServe directly from this site and take advantage of a secure Apache web server platform for all your projects!

The installation is really simple, in only 3 steps your fox will be a foXServe.

The only requirement is a fox LX 832. After the installation the uptodate system will be activated and all future upgrades will be provided from the central repository.

The config command facility will help you to install all additional modules available for foXServe typing just one letter on your keyboard!

Take a look to <http://www.foxserve.it> to discover all the software available.

foXServe is approved by acmesystem, so the Acme Systems warranty will NOT be voided flashing your FOX Board with this software

What are you waiting for? upgrade your fox board now!

To download foXServe you need to register you on the site, then [click here](#) to jump to download page.

[foXServe Documentation index](#)

Now is possible to join the foXServe system to ACME SYSTEMS SDK!

In this way you can create YOUR OWN CUSTOM fimage foXServe based. Obviously the uptodate feature is not present or you will lost your custom kernel on upgrade. Feel free to use this firmware and redistribute it, I ask only that you'll say on your product powered by foXServe.

Feel free to use the logo when you say "powered by foXServe" in one of the way that you can find here .
