

XML: undefined entity

BUG description:

Errore interpretazione XML: entità non definita

Indirizzo: http://192.168.0.98/source/read_sms.php

Linea numero 62, colonna 49: <td class="txt" colspan="6">à é è # ' * £ \$ </td>

When a SMS message received contains ò à è é ì ù £ € ! " \$ % & / () = ? [] + * @ ° - symbols.

This bug is caused by a wrong interpretation of symbols from the browser XSL engine, to solve this issue you have to upgrade the charset from UTF-8 to ISO-8859.

Follow this steps:

Download the patch from [here](#) and unzip it.

1- Log into the box using FTP with username: root password:pass

2- replace the file parser.php in /etc/sms/scripts/parser.php with the new one.

3- replace the file main.php in /mnt/flash/root/media/languages/main.php with the new one

4- delete the last message from table GSMIN using the internal SQL editor available in the bottom right of System & Profile
